

Interfaces stored locally... and another path to  
integrate external systems

## Interfaces Stored Locally

- SBA solution
- Deliver updates to multiple installations
- Create bugs for all customers
- Fix those bugs quickly

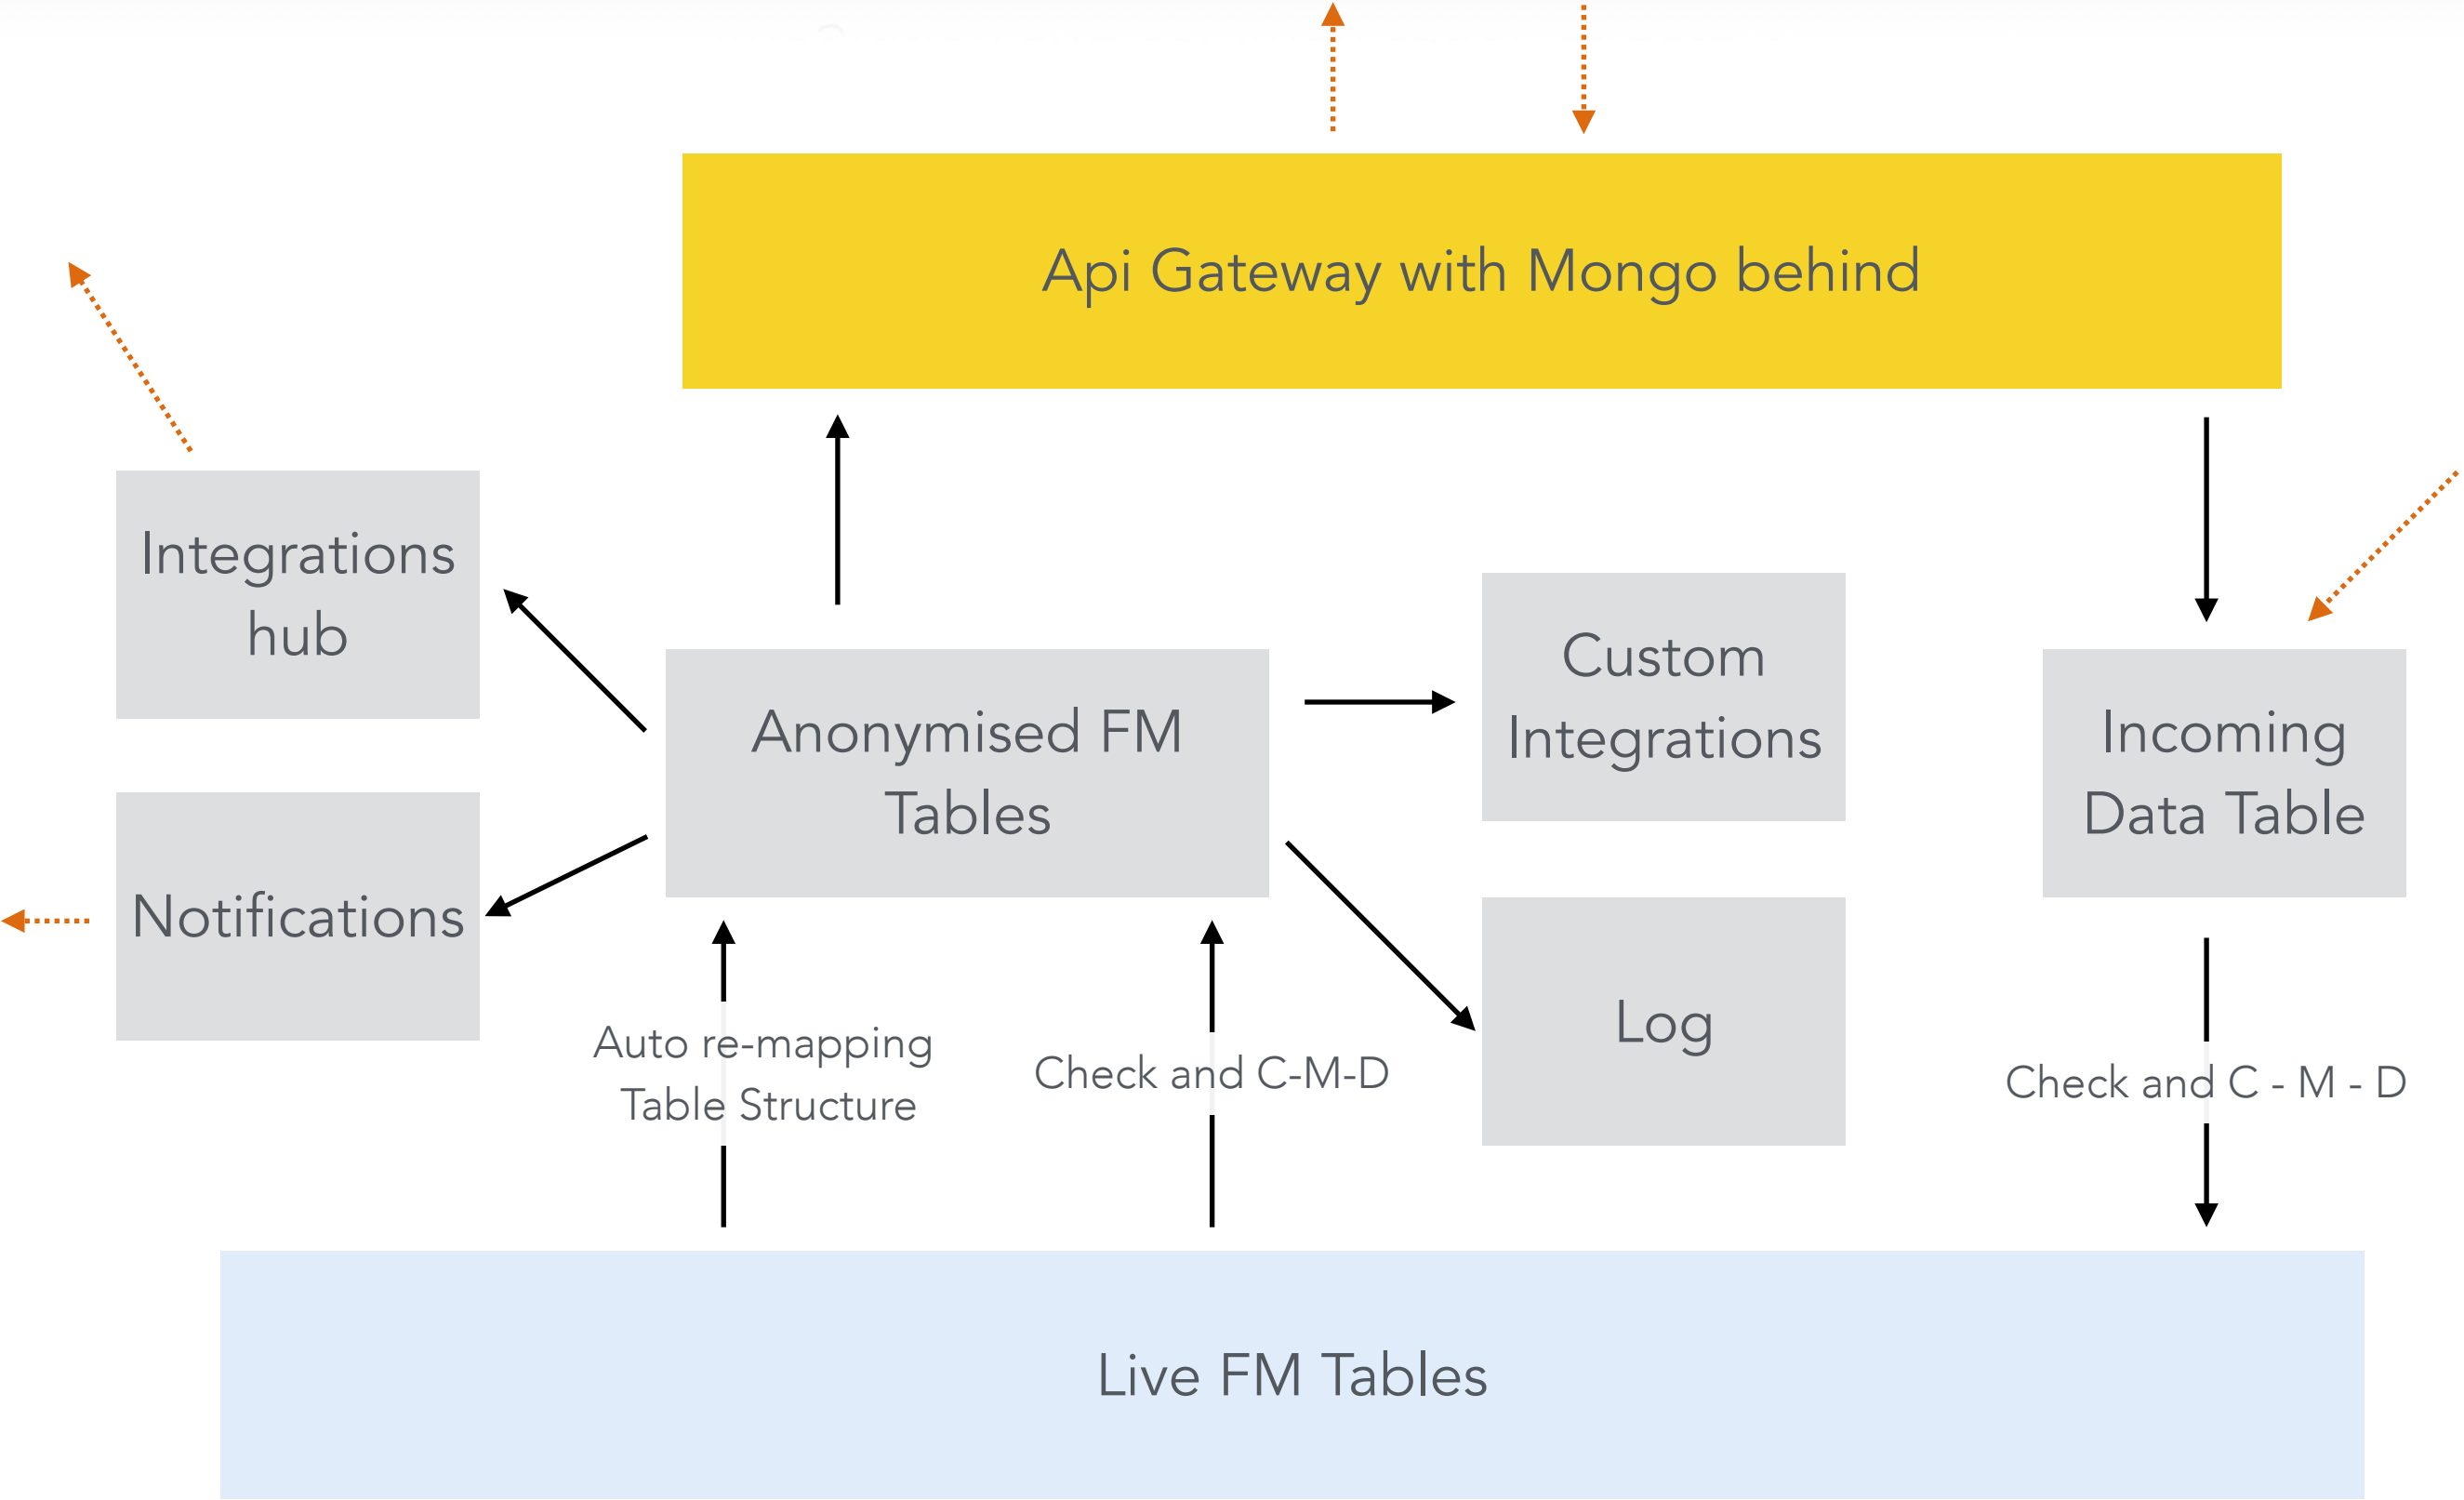

# Updating interfaces

Why? Have a unique hub to manage all integrations with third party system or custom FM apps

- Company apps and systems / web based applications
- Solve the issue of on premise availability
- Export/import data
- Build connectors to standard systems (ex. Automatic Warehouses)
- (bonus) Audit log

# Integration and communication structure
